

# FENTANYL

# CAN KILL

## BE SMART, BE SUBSTANCE AWARE

- Fentanyl is extremely addictive!
- You can never really know where substances are coming from.
- Any substance can contain fentanyl or similar opioids, there is no way for you to test before using.
- Fentanyl is often mixed with other substances to make them more potent and addictive.
- An alarming rate of substances mixed with fentanyl are contributing to Nation-wide opioid overdoses ie. heroin, cocaine and even marijuana.
- THINK BEFORE YOU USE, CHOOSE TO BE SUBSTANCE FREE!

IT'S NEVER GOING TO BE YOU...  
**UNTIL IT IS.**

Fentanyl may be hiding in the  
drugs you're using.

## BE SAFE...

If you are at risk of exposure to opioids be safe, pick up a Naloxone Kit available at your local pharmacy (1769 Chiefswood Road, Ohsweken) or a pharmacy in the surrounding area. Kits will be distributed to at-risk patients or their family members cost-free, without a prescription.

A valid Ontario Health Card will need to be presented. Information on how to administer the lifesaving drug will also be provided.

Be safe, carry Naloxone and NEVER use alone!
