SPAY/NEUTER

 *Six Nations Animal Control Services*
 *Spay/Neuter Clinics*

**Starting April 29 & 30
& June 23 & 24**

Male benefits from surgery;

Your male dog will be less likely to roam away from home. An intact male will do just about anything to find a mate, including finding creative ways escape from the house. Some aggression problems may be avoided by early neutering. Neutering reduces dominance and aggression. Neutering helps re-focus your dog's attention from other dogs to YOU. Neutering reduces the risk of prostate disorders. Neutering prevents testicular cancer.

Female benefits from surgery; Your female pet will live a longer, healthier life. Spaying helps prevent uterine infections and breast tumors, which are malignant or cancerous in about 50 percent of dogs and 90 percent of cats. Spaying your pet before her first heat offers the best protection from these diseases. Your spayed female pet won't go into heat. While cycles can vary, female felines usually go into heat four to five days every three weeks during breeding season.

PRE-PAYMENT REQUIRED to Secure your spot (cash only)
